

Product Quality

Versacryl® Coatings provide the following performance benefits to ensure years of beautiful and durable service:

- Exceptional 10 year color stability
- Will not provide a food source for mold, mildew and algae formation
- Stain resistant to common spills such as red wine, grease splatter and condiments
- Formulated to reduce surface temperatures for improved comfort
- Abrasion resistant to scuffs and mars
- Exceptional slip resistance when used on decks, docks and other walking surfaces
- Available in 5 colors allowing accented mix and match colors for railings, steps and other accent trims

Versacryl® Restoration Coatings are made in the USA.

Over our 20 year history, Versacryl® has become the only long term system for providing homeowners and commercial customers the performance they expect. The combination of color selection, color hold, abrasion resistance, slip resistance, lower heat build-up, stain resistance and mold, mildew and algae resistance is exceptional.

Versacryl® Restoration Solutions

*Give your weathered,
faded, or stained
WPC/vinyl deck a new
life with Versacryl.*

Versacryl Restoration Solutions

Versacryl Restoration Solutions (VRS) restores faded, stained and deteriorated decks, steps, railings, docks, boardwalks, and fencing.

Versacryl® coating system will restore faded, stained, and deteriorated outdoor vinyl and composite surfaces. These applications include decks, docks, railing, boardwalks and fences. Versacryl® can also be used on pergolas and other outdoor decorative wpc and vinyl surfaces.

You can use any of our 5 standard colors regardless of original color.

Versacryl® is applied using 2 coats. Most Versacryl coating projects will take 3-4 days to complete including prep work. You can walk on Versacryl® 24 hours after final coat is applied. Heavy objects such as tables, grills etc. can be returned after 5 days from application of final coat.

Home owner will receive our 10 year Product Quality Statement featuring our 10 year color hold warranty at the completion of the job.

Versacryl® Coatings are specially engineered to provide years of dependable service as a long-term restoration alternative, to the high cost of removing and replacing your weathered outdoor WPC and vinyl surfaces.

The Versacryl Restoration Solution is a cost effective alternative to the restoration costs of approximately 20 to 25% of the cost of replacement for the deck and 10 to 15% of the railings and other structures.

Replacement cost estimates can vary by geographic area and complexity of project.
